

# Install a Smart Irrigation Controller to See Water Savings

Saves Water and Saves Money: It's a Win-Win!

**It's 2025! All automatic irrigation systems **MUST** now be fitted with a WaterSense-labeled smart controller.**

Water use skyrockets during the spring and summer months, largely due to lawn irrigation. Many residents are unknowingly overwatering their lawns and landscapes, which is detrimental to their overall health and resiliency.

- Installing a smart irrigation controller is the best way to conserve and save money while irrigating your property. Here's how they help:
  - Using WiFi signals, they connect to local weather forecasts and adjust watering schedules accordingly.
  - You will eliminate the risk of overwatering and save up to 30% more water.

# Roslyn Water District

## Mandatory Irrigation Guidelines

To accommodate for drastically increased water use during the summer, the Roslyn Water District has instituted mandatory guidelines that residents must follow when irrigating their lawns.

- Residents must adhere to Nassau County's Odd/Even Lawn Watering Ordinance
- Absolutely NO WATERING from 10 am to 4 pm
- The Roslyn Water District has designated specific watering times for residents based on where their property lies:
  - Villages of Roslyn, Roslyn Estates and Roslyn Harbor: 10 pm – midnight
  - Village of East Hills: midnight – 2 am
  - Villages of Flower Hill and North Hills and unincorporated areas of Roslyn Heights, Greenvale, Albertson, Glenwood Landing and Port Washington: 8 am – 10 am
  - Municipal and Commercial Properties: 6 pm – 8 pm
